## UCR STS Initiative Contributor: Linda Jean Hall

Ready to publish about the STS experience in your department?

Website URL: <https://www.easst.net/article/science-and-technology-studies/>

The image is a screenshot of the EASST website. At the top left is the EASST logo, which consists of the word "easst" in a bold, lowercase, sans-serif font. The "a" and "s" are white, while the "e", "s", "t", and "t" are green. The logo is set against a circular background of green lines radiating from the center. To the right of the logo is the text "european association for the study of science and technology" in a smaller, lowercase, sans-serif font. In the top right corner, there is a navigation menu with the following items: "home", "about easst", "s&ts journal", "easst review", and "cor". Below the header is a large, light gray graphic of a gear or a stylized sunburst. The main content area features the title "JOURNAL SCIENCE AND TECHNOLOGY STUDIES" in a large, uppercase, sans-serif font. Below the title is a paragraph of text describing the journal's focus and scope. At the bottom of the page, there is another paragraph of text providing information about the journal's affiliation and access.

### JOURNAL SCIENCE AND TECHNOLOGY STUDIES

*Science & Technology Studies* is an international peer-reviewed journal dedicated to the advancement of scholarly studies of science and technology as socio-material phenomena, including their historical and contemporary production and their associated forms of knowledge, expertise, social organization and controversy. This includes interest in developing Science and Technology Studies' own knowledge production techniques, methodology and interventions. The journal welcomes all high quality contributions that are based on substantial theoretical or empirical engagement within the multidisciplinary field of science and technology studies, including contributions from anthropology, sociology, history, philosophy, political science, educational science and communication studies. *Science & Technology Studies* is published four times a year from the beginning of 2016. And the most recent special issues have concerned politics of innovation and energy systems and infrastructures in society, and upcoming special issues include: university society relations; global health; numbers and numbering; and knowledge infrastructures.

*Science & Technology Studies* is the official journal of the European Association for the Study of Science and Technology (EASST) and the Finnish Association for Science and Technology Studies (FSTS). The journal is open access and available electronically around the world, after a four month embargo on its latest issue, which is available only to subscribers and members of its host organizations.
